PRIMARY PAID ECAs

| ECA | Provider | Description | Max Pupils | Cost |
|-------------------------|------------------|---|------------|-------------------|
| Chess | Chess Knowledge | <p>Chess is a very old board game, it's a tool for education and skills development under the guidance of a team of internationally certified instructors.</p> <p>Chess Knowledge Team will teach Students the fundamental of chess strategy, tactics another key concept in a fun and highly engaging way. Statics have shown that chess is a great way to strengthen memory, enhance creativity, develop solving skills and boost the analytical abilities of children, teach children the value of planning and foresight, self-instill discipline, self-confidence, perseverance, and sportsmanship.</p> <p>To maintain the delicate balance our coaches will work individually with each student inside the group, which will take them up-level further from the Beginners level to Intermediate level.</p> <p>Children who study chess are also known to improve their academic performance. A child who makes great chess moves can make great life move.</p> | 20 | AED 665 (7 weeks) |
| Coding with Game Design | Logix Engine | <p>Coding is what makes it possible for us to create computer software, apps and websites. Your browser, your OS, the apps on your phone, Facebook, and this website – they're all made with code. Coding helps young people learn to think creatively, reason systematically, and work collaboratively — essential skills for life in the 21st century. With Scratch Junior, and Scratch 3 (developed by MIT Media Lab) and many more, they can program their own interactive stories, games, and animations — and share their creations with others in the online community. This is a Game Design program where they work on coding their own games using Scratch 3.0</p> | 15 | AED 540 (6 weeks) |
| Empire Football | Empire Football | Empire will provide football training for students in year 3 and above. | 24 | AED 625 (7 weeks) |
| ETB | Engineers To Be | <p>Our engineering workshops are hosted by actual engineers who take the students through the same journey engineers go through in real life; from understanding a concept to designing to building and testing their work. The classes help the students improve many of their skill, learn more about the different engineering fields and learn how to use different tools safely. Each term the students will have a new project that demonstrates one or more engineering concept, and they get to take their projects home.</p> | 24 | AED 650 (7 weeks) |
| Gymnastics | Du Gym | <p>DuGym is a gymnastics club that has been operating in Dubai for 20 years. We are pleased to announce that we will again be offering to SAFA students an exciting programme of gymnastics where they learn the basics of gymnastics which is:-</p> <p>A – AGILITY B – BALANCE C – CO-ORDINATION</p> <p>The lessons are work on students:</p> <p>S – Suppleness S – Strength S -Stamina S - Speed S – Skills</p> <p>At the end of each term the students are assessed on skills and they can achieved merit certificates based on their attainment. Students who achieve 5 star merit certificates are selected for school based competitions at the end of the summer term.</p> | 24 | AED 585 (7 weeks) |
| Karate | Champions Karate | Traditional Shotokan Karate taught with a modern coaching philosophy | | AED 550 (6 weeks) |
| Robotics | Logix Engine | <p>Theme Wheeled Wonders Early Robotics is a fun-based course for aspiring young learners. It focuses on delivering the logical sequential thought process imperative for programmers, bundling it with problem-solving, engineering design and critical thinking. Learners create designs ranging from simple rovers with sensors, to fully-functional complex automotive; they create flood gates, and generate earthquakes as they create simulations that assist them in challenging their own threshold of understanding. Customized project-based challenges enable students to generate novel and useful solutions to real world situations, a skill that has become critical to leverage knowledge success. This program uses Lego Wedo2.0 as the educational platform.</p> | 15 | AED 570 (6 weeks) |
| Tennis | Rackets Academy | Rackets Academy offers an introductory Program to Tennis. Working in the basics elements of the game to set them up for taking the game further in the future. | 20 | AED 700 (7 weeks) |

| Volleyball (U16 / U19) | | Children will have the chance to develop their specific Volleyball skills and play games. Students that show a high ability may also be chosen to represent the school in the Volleyball Squads. | |
| World Scholars Cup | Ms L Kelly Ms E Nolan Ms F Jinad | World Scholar's Cup is a celebration of learning. It brings together many subjects because before we can begin to specialize, we need to see the big picture. It challenges teams to work together because there's nothing harder or more inspiring than knowing that someone else depends on you. And it deals with serious global issues without taking itself too seriously. This is an academic competition. But it's different from other competitions, in that it's probably not even a competition. It is a celebration. Instead of focusing on memorizing facts, WSC is all about applying them and relating them to the world around us. You may learn about the housing bubble, or why Yue Minjun painted five unclothed men laughing in front of five white birds, and debate whether there will be another bubble even when we most expect it, or what a painting of laughing men could mean in a regime that never laughs at itself. Whatever you do, you're celebrating learning, even if you don't think you like learning. Before you know it, you'll be asking for more topics to explore. | By Invitation only |
| X Country (Secondary) | | This club is aimed at developing student Cardiovascular Endurance. It will include running longer distances and working on skills such as pacing/race tactics & muscular strength development. | |

SECONDARY PAID ECAs

| ECA | Provider | Description | Max Pupils | Cost |
|--------------------|--------------|---|------------|-------------------|
| App Design | Logix-Engine | This is an introductory course to App Design and is an application of coding. It introduces students to the basic concepts of mobile app development, which include the user interface, and user experience design, developing an idea of data persistence at different levels. Students design applications like the Translate app, Navigate App, and more as they work through the interfaces of creating their Apps. | 15 | AED 630 (7 weeks) |
| Python Programming | Logix-Engine | Python is one of the most loved programming languages used by developers, data scientists, software engineers, and even hackers because of its versatility, flexibility, and object-oriented features. It is easy to learn and has a clean syntax, and is the recommended choice for a text-based programming language for beginners and as well as experienced programmers. These sessions will take students through our levelled program – commencing with a set of introductory sessions into python. | 15 | AED 700 (7 weeks) |
